INFORMATION FOR FACULTY & STAFF

Federal and state laws require this information to be distributed annually to faculty & staff

UNIVERSITY OF WISCONSIN

Colleges

The freshman/sophomore UW campuses

2009-2010

The freshman/sophomore UW campuses

August 2009

Dear Colleague:

Each of us is dedicated to our students, to our communities, and to our colleagues. We make this dedication come alive with creative teaching and services which we deliver with humanity and compassion. But it isn't a perfect world.

Enclosed are several items I ask you to review and keep accessible. They deal with sexual harassment, policies and information regarding alcohol and other drug abuse, and information regarding the Americans with Disabilities Act. As a public institution, we are mandated by law to provide you with this material. These are mandates I regard seriously, as should we all, in keeping with the spirit of the UW Colleges as an institution of higher education that values the quality of relationships among students, faculty and staff.

Thanks for making the UW Colleges a congenial place to learn and work.

A handwritten signature in black ink that reads 'D. Wilson'.

David Wilson
Chancellor

UW-Extension and UW Colleges

sexual assault information

On April 9, 1990, Wisconsin Act 177 Sexual Assault Information was signed into law. The law requires institutions of higher education to distribute information pertaining to sexual assault to all students.

Also included in the law is a requirement that any person employed at an institution (including student employees) who witnesses a sexual assault on campus, or receives a report from a student enrolled in the institution that the student has been sexually assaulted, must notify the dean of the campus. The dean must then compile reports for the purpose of disseminating statistical information. The employee making the report does not have to provide the name of the victim.

Section 940.225 of the Wisconsin Statutes creates four degrees of sexual assault. The degrees are based upon the amount of force used by the assailant and the harm done to the victim.

FIRST DEGREE SEXUAL ASSAULT includes: sexual contact or sexual intercourse without consent which causes pregnancy or great bodily harm; or sexual contact or sexual

intercourse accomplished by using or threatening to use a dangerous weapon, or any article used or fashioned in a manner to lead the victim reasonably to believe it to be a dangerous weapon, or sexual contact or sexual intercourse without consent or by use of threat of force or violence while aided or abetted by one or more persons.

SECOND DEGREE SEXUAL ASSAULT includes: sexual contact or sexual intercourse without consent through the use or threat of force or violence; or sexual contact or sexual intercourse without consent which causes injury, illness, disease, or impairment of a sexual or reproductive organ, or mental anguish requiring psychiatric care; or sexual contact or sexual intercourse with a person known by the perpetrator to be unconscious, or sexual contact or sexual intercourse with a person who suffers from a mental illness or deficiency which renders the person temporarily or permanently incapable of appraising the person's conduct and the defendant knows of such condition, or sexual contact or sexual intercourse without consent while aided by one or more persons,

or sexual contact or sexual intercourse with a person who is under the influence of an intoxicant to a degree which renders that person incapable of appraising that person's conduct and the defendant knows of such condition.

THIRD DEGREE SEXUAL ASSAULT includes having sexual intercourse with a person without that person's consent or intentional penile ejaculation of ejaculate or intentional emission of urine or feces by the defendant upon any part of the body clothed or unclothed of the complainant if that ejaculation or emission is either for the purpose of sexually degrading or sexually humiliating the complainant or for the purpose of sexually arousing or gratifying the defendant.

FOURTH DEGREE SEXUAL ASSAULT is having sexual contact with a person without that person's consent.

If you have any questions about sexual assault, or your obligations under the law, please contact your supervisor.

Americans with disabilities act

The Americans with Disabilities Act (ADA) prohibits discrimination against people with disabilities, and ensures that they have an equal opportunity to fully participate in all aspects of society, including education. The ADA applies to UW Colleges' students, applicants, employees, and the members of the public who participate in our programs or events. The ADA is applicable not just to the classroom setting, but also includes social, recreational, and enrichment aspects of campus life, too, such as outreach activities and sporting events.

UW Colleges must provide accommodations so that people with disabilities have access to the UW Colleges' programs and services. Accommodations could include things like purchasing specialized technology, removing barriers when readily achievable, or modifying "no pets" policies to allow for service animals. In addition, we also need to ensure "effective communication" for people with disabilities, which means that we need to hire sign language interpreters, provide materials in an alternative

formats (Braille, enlarged font, tape recordings, accessible electronic document, etc.), or use the Wisconsin Relay System. The Relay System enables people who are deaf, hard of hearing, or having a speech impairment to communicate with others using the phone system. It is a free service that can be accessed using a regular phone by dialing "711" (similar to the emergency "911" system).

If you receive an accommodation request or require an accommodation yourself, please contact the central Human Resource department at NUMBER (for employees), the Coordinator of Services for Students with Disabilities office at 608-262-2001 (for students), or the central Diversity office at 608-265-2406 (for members of the public). These staff have experience coordinating accommodation requests, and can also guide you to other disability-related resources that you may find valuable.

The University of Wisconsin Colleges does not discriminate on the basis of age, race, religion, creed, color, handicap, gender, sexual orientation, disability, national origin, ancestry, marital status, arrest record, or conviction record in employment or in admission to and treatment in its educational programs and activities as required by state and federal laws and regulations including Title IX and Sections 503 and 504 of the Rehabilitation Act of 1976. Inquiries concerning the application of AA/EEO procedures may be directed to UW Colleges Office of Human Resources, Pam Dollard, Director, pamela.dollard@uw.edu, 608/890-1066, 432 N. Lake Street, Madison, WI 53706-1498.

alcohol and other drug information

HEALTH EFFECTS OF ALCOHOL AND OTHER DRUG USE

The abuse of alcohol and the use of other drugs are detrimental to the health of the user. Further, the use of drugs and alcohol is not conducive to an academic atmosphere. Drugs impede the learning process and can cause disruption for other students and can disturb their academic interests. The use of alcohol or drugs in the workplace may also impede the employee's ability to perform in a safe and effective manner, and may result in injuries to others. Early diagnosis and treatment of drug and alcohol abuse is the best interest of the student, employee and the university.

ALCOHOL

Alcohol is the most frequently abused drug on campus and in society. Alcohol is chemically classified as a mind-altering drug because it contains ethanol and has the chemical power to depress the action of the central nervous system. This depression affects motor coordination, speech and vision. In great amounts, it can affect respiration and heart rate control. Death can result when the level of blood alcohol exceeds 0.40%. Prolonged abuse of alcohol can lead to alcoholism, malnutrition and cirrhosis.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

ANABOLIC STEROIDS

Concerns over a growing illicit market and prevalence of abuse combined with the possibility of long-term effects of steroid use, led Congress to place anabolic steroids into Schedule III of the Controlled Substances Act (CSA). Although the adverse effects of large doses of multiple anabolic steroids are not well established, there is increasing evidence of serious health problems associated with the abuse of these agents, including cardiovascular damage, liver damage and damage to reproductive organs. Physical side effects include elevated blood pressure and cholesterol levels, severe acne, premature balding, reduced sexual function and testicular atrophy. The CSA defines anabolic steroids as any drug or hormonal substance chemically and pharmacologically related to testosterone (other than estrogens, progestins, and corticosteroids), that promotes muscle growth. Those commonly encountered on the illicit market include: boldenone (Equipose), ethylestrenol (Maxibolin), fluoxymesterone (Halotestin), methandriol, methandrostenolone (Dianabol), methyltestosterone, nandrolone (Durabolin, Deca-Durabolin), oxandrolone (Anavar), oxymetholone (Anadrol), stanozolol (Winstrol), testosterone and trenbolone (Finajet).

CANNABIS

Three drugs that come from cannabis—marijuana, hashish, and hashish oil—are currently distributed on the U.S. illicit market. These drugs are deleterious to the health and impair the short-term memory and comprehension of the user. When used, they alter the sense of time, and reduce the ability of the user to perform tasks requiring concentration and coordination. They also increase the heart rate and appetite. Motivation and cognition can be altered, making acquisition and retaining of new information difficult. Long-term users may develop psychological dependence that can produce paranoia and psychosis. Because cannabis products are usually inhaled as unfiltered smoke, they are damaging to the lungs and pulmonary system and have more cancer-causing agents than tobacco.

DEPRESSANTS

Depressants produce central nervous system depression. Depressants (i.e., barbiturates, benzodiazepines, glutethimide, methqualone, and meprobamate) can cause physical and psychological dependence that can lead to respiratory depression, coma and death, especially when used in concert with alcohol. Withdrawal can lead to restlessness, insomnia, convulsions and even death. Chloral hydrate, a hypnotic depressant, and alcohol constitute the infamous date rape drug or "Mickey Finn."

HALLUCINOGENS

LSD, PCP, mescaline and peyote are classified as hallucinogens. Hallucinogens interrupt the brain messages that control the intellect and keep instincts in check. Large doses can produce convulsions and coma, heart and lung failure. Chronic users complain of persistent memory problems and speech difficulties for up to a year after their use. Because the drug stops the brain's pain sensors, drug experiences may result in severe self-inflicted injuries. Persistent memory problems and speech difficulties may linger.

NARCOTICS

The term narcotic derives from the Greek word for stupor. Narcotic use is associated with a variety of unwanted effects including drowsiness, inability to concentrate, apathy, lessened physical activity, constriction of the pupils, dilation of the subcutaneous blood vessels causing flushing of the face and neck, constipation, nausea and vomiting and, most significantly, respiratory depression. With repeated use of narcotics, tolerance and dependence develop. Users of narcotics, such as heroin, codeine, morphine, and opium, are susceptible to overdose that can lead to convulsions, coma and death.

STIMULANTS

Cocaine is the most potent stimulant of natural origin. "Crack" is the chunk form of cocaine that is ready-to-use freebase. These drugs stimulate the central nervous system and are extremely addictive. They can cause psychological and physical dependency which can lead to dilated pupils, increased pulse rate, elevated blood pressure, insomnia, loss of appetite, paranoia, and seizures. They can also cause death by disrupting the brain's control of the heart and respiration.

The use of amphetamines and other stimulants can have the same effect as cocaine and cause increased heart rates and blood pressure that can result in a stroke or heart failure. Symptoms include dizziness, sleeplessness, and anxiety. They can also lead to hallucinations, paranoia, psychosis, and even a physical collapse.

Nicotine is a highly addictive stimulant, whether ingested by smoking or chewing. This drug hits the brain in six seconds, and damages the lungs, decreases heart strength, and is associated with many types of cancers. The withdrawal symptoms include anxiety, progressive restlessness, irritability, and sleep disturbance.

EMPLOYEE ASSISTANCE PROGRAM

It is a resource for employees, their family members, and/or significant others that provides, among other things, assessment of problems,

information about community resources, and referrals for individuals in need of help. If you need help, contact:

Patrick DuCharme
patrick.ducharme@uwex.uwc.edu
Employee Assistance Office
226 Lowell Hall
610 Langdon St.
Madison, WI 53703
Phone:
(7:45a.m. - 4:30p.m., Mon-Fri)
800/385-8511, 608/265-5127
Wisconsin Relay: 711
Fax: (608) 265-3398

ON CAMPUS RESOURCES

Students who are concerned about their own use of alcohol and other drugs or about the use of someone close to them may contact the UW Colleges Alcohol and Other Drug Education (AODE) Program Manager or the Office of Student Services for information and assistance. Voluntary contacts may remain confidential.

Wendy Seegers
UW Colleges
AODE Program Manager

WARNING SIGNS

If you know someone who has problems related to drinking alcohol or other drug use, you're not alone. You don't have to be an expert to know if your friend has a problem. If he or she has these kinds of troubles related to alcohol or other drugs, your friend may need to talk with someone.

Does he or she:

- try to hide his or her drinking or other drug use?
- not remember what happened while he or she was using drugs or drinking?
- have problems in job or school performance?
- take physical risks, such as driving, biking or swimming, while intoxicated?
- think about getting high a lot?
- limit friends to those who drink or use drugs a lot?
- seem unable to have a good time or to party unless alcohol or drugs are available?
- say he or she sometimes NEEDS a drink or drug?
- get angry when you mention your concerns and deny that there's anything wrong?
- have a history of alcohol or other drug problems in the family?

HOW YOU CAN HELP

First, learn more about alcohol and other drug abuse. Libraries, alcohol and other drug information agencies, and treatment colleges are good places to get more information.

Next, find out where your friend can get help on campus or in your community. Having this information available if and when your friend needs it will pay off: most people who seek help for alcohol or drug problems get better.

Let your friend know how much you care. Explain how his or her drinking and/or other drug use affects you and your friendship. Use your own words and say what is right for you. Be honest and specific. Say exactly what makes you unhappy and how those problems relate to drinking and/or drugs.

Don't get discouraged if your friend gets angry, refuses to listen, or denies the problem. These reactions are common in people who have alcohol or other drug problems. All you can do is say how you feel, show that you care and suggest ways to get help. Feel okay if you do that. Only your friend can make the final decision to get help.

*Information taken from
the Wisconsin Clearinghouse.*

STATE OF WISCONSIN LEGAL SANCTIONS

The Uniform Controlled Substances Act, Chapter 961 of the Wisconsin Statutes, regulates controlled substances and outlines specific penalties for the violation of the regulations. A first-time conviction for possession of a controlled substance can result in a sentence of up to one year in prison and a fine of up to \$5,000. Sec. 961.41(3g), Stats. A person convicted of manufacturing a controlled substance, delivering a controlled substance, or possessing a controlled substance with an intent to manufacture or deliver, can be imprisoned for up to 30 years and fined up to \$1,000,000. Secs. 961.41(1) and (1m), Stats. Penalties vary according to the type of drug involved, the amount of drug confiscated, the number of previous convictions, and the presence of any aggravating factors. The distribution of a controlled substance to a minor can lead to the doubling of an authorized sentence term. Section 961.46, Stats.

Revision 1/97

UNIVERSITY SANCTIONS

UNIVERSITY OF WISCONSIN COLLEGES
STANDARDS OF CONDUCT AND UNIVERSITY
SANCTIONS CONCERNING ILLICIT
DRUGS AND ALCOHOL

The University of Wisconsin System and University of Wisconsin Colleges prohibit the unlawful possession, use, distribution, manufacture or dispensing of illicit drugs and alcohol by students and employees on university property or as part of university activities.

The use or possession of alcoholic beverages is prohibited on university premises, except in faculty and staff housing and as expressly permitted by the chief administrative officer or under institutional regulations, in accordance with s. UWS 18.06(13)(a), Wis. Adm. Code. Without exception, alcohol consumption and procurement are governed by Wisconsin statutory age restrictions under s. UWS 18.06(13)(b), Wis. Adm. Code.

The unlawful use, possession, distribution, manufacture or dispensing of illicit drugs ("controlled substances") as defined in ch. 961, Wis. Stats.) is prohibited in accordance with s. UWS 18.10(l), Wis. Adm. Code.

Violation of these provisions by a student may lead to the imposition of a disciplinary sanction, up to and including suspension or expulsion, under s. UWS 17.03(l)(b), Wis. Adm. Code. University employees are also subject to disciplinary sanctions for violation of these provisions occurring on university property or the worksite or during work time, up to and including termination from employment. Disciplinary sanctions are initiated and imposed in accordance with applicable proce-

alcohol and other drug information continued

dural requirements and work rules, as set forth in Wisconsin statutes, administrative rules, faculty and academic staff policies, and collective bargaining agreements. Referral for prosecution under criminal law is also possible. Further, violations of ss. UWS 18.06(13) and 18.10(l), Wis. Adm. Code may result in additional penalties as allowed under ch. UWS 18, Wis. Adm. Code.

Employees who are convicted of any criminal drug statute violation occurring in the workplace must notify their dean, director or department chair within 5 days of the conviction if the employees are employed by the university at the time of the conviction.

Employees who have problems with alcohol or controlled substances are encouraged to voluntarily contact their Employee Assistance Program (EAP) coordinator for referral to counseling or treatment programs. Early diagnosis and treatment of chemical abuse are in the best interest of the university and the employee. Voluntary contact with the EAP coordinator may remain confidential. The UW Colleges EAP Coordinator is Patrick DuCharme (patrick.ducharme@uwex.uwc.edu). The EAP telephone number is 1-800-385-8511.

PREVENTION

The Prevention Resource Center is a statewide program of the Wisconsin Clearinghouse that provides an array of services to nonprofit, private and public sector organizations and educators throughout Wisconsin. Services include disseminating alcohol and drug abuse awareness and prevention-related materials, lending curricula, videos and books, and providing technical assistance in such areas as grant writing and program evaluation. Staff also present ideas and information at conferences and workshops. The Wisconsin Clearinghouse also mails the "Prevention Package" to more than 50 sites, providing information on new publications, successful programs, and a calendar of upcoming conferences and training events. The "Prevention Outlook" newsletter is also published, with up-to-date articles on important issues in the prevention field.

TREATMENT

The Wisconsin Department of Health and Social Services, through its Division of Community Services, publishes a comprehensive pamphlet listing facilities around the state that provide treatment for drug and alcohol addiction. To obtain a copy of this pamphlet, entitled "Wisconsin Alcohol and Drug Abuse Services Directory," contact the Wisconsin Clearinghouse at 1-800-248-9244, or write to the following address: Wisconsin Clearinghouse, University Health Services, 1552 University Avenue, Madison, WI 53705.

As part of the University Health Services at the University of Wisconsin-Madison, the mission of the Wisconsin Clearinghouse is to help schools, families, and communities to lead healthy and productive lives. The Wisconsin Clearinghouse has been disseminating information and providing alcohol and drug abuse prevention products and services nationally and state-wide for more than 20 years.

The Wisconsin Clearinghouse publishes a free catalog that lists more than 300 alcohol and drug abuse awareness and prevention materials (i.e., videotapes, software, curricula, activity books, pamphlets, and posters.) If you'd like to receive a free catalog by mail, call the Wisconsin Clearinghouse at 1-800-322-1468 or e-mail your request to: wchpr@www.uhs.wisc.edu

Revised 8/09

FEDERAL SANCTIONS

Pursuant to federal law, the United States Sentencing Guidelines establish mandatory minimum penalties for categories of drug offenses and provide for penalty enhancements in specific cases. Under these federal guidelines, courts can sentence a person for up to 6 years for unlawful possession of a controlled substance, including the distribution of a small amount (less than 250 grams) of marijuana; a sentence of life imprisonment can result from a conviction of possession of a controlled substance that results in death or bodily injury; and, possession of more than 5 grams of cocaine can trigger an intent to distribute penalty of 10-16 years in prison.

Federal Penalties and Sanctions for Illegal Possession of Controlled Substances:

21 U.S.C. 844(a)

1st conviction: Up to 1 year imprisonment and fined at least \$1,000 but not more than \$100,000, or both.

After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least \$2,500 but not more than \$250,000 or both.

After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least \$5,000 but not more than \$250,000, or both.

Special sentencing provisions for possession of crack cocaine:

Mandatory at least 5 years in prison, not to exceed 20 years and fined up to \$250,000 or both, if: (a) 1st conviction and the amount of crack possessed exceeds 5 grams; (b) 2nd crack conviction and the amount of crack possessed exceeds 3 grams; or (c) 3rd or subsequent crack conviction and the amount of crack possessed exceeds 1 gram.

21 U.S.C. 853(a)(2) and 881(a)(7)

Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1 year imprisonment. (See special sentencing provisions re: crack, above.)

21 U.S.C. 881(a)(4)

Forfeiture of vehicles, boats, aircraft or any other conveyance used to transport or conceal a controlled substance.

21 U.S.C. 844a

Civil fine of up to \$10,000.

21 U.S.C. 862

Denial of Federal benefits, such as student loans, grants, contracts, and professional and commercial licenses, up to 1 year for first offense, up to 5 years for second and subsequent offenses.

18 U.S.C. 922(g)

Ineligible to purchase, receive, or transport a firearm.

MISCELLANEOUS

Revocation of certain Federal licenses and benefits, e.g., pilot licenses, public housing tenancy, etc., are vested within the authorities of individual Federal agencies.

Drugs of Abuse: Uses and Effects

Drugs		Trade/Street Names	Medical Uses	Physical Dependence	Psychological Dependence	Tolerance	Usual Methods of Administration	Possible Effects	Effects of Overdose	Withdrawal Syndrome	
Stimulants	Cocaine	Coke, crack, snow	Local anesthetic	Possible	Moderate (oral); Very high (injected IV or smoked)	Possible	Sniffed, smoked, injected	Increased alertness, excitation, euphoria, increased pulse rate and blood pressure, insomnia, loss of appetite	Agitation, increased body temperature, hallucinations, convulsions, possible death	Severely depressed mood, prolonged sleep, apathy, irritability, disorientation	
	Amphetamines	Biphetamine, Desoxyn, Dexedrine, meth, ice	Weight control, hyperactivity, narcolepsy			Yes	Oral, injected				
	Methylphenidate	Ritalin									
	Phenmetrazine	Preludin									
	Other stimulants	Adipex, Bacarate, Cylert, Didrex, Sanorex, Tenuate, Tepanil									
	Depressants	Chloral hydrate	Noctec	Hypnotic	Moderate	Moderate	Possible	Oral	Slurred speech, disorientation, staggering, drunken behavior	Shallow respiration, cold and clammy skin, weak and rapid pulse, coma, possible death	Anxiety, insomnia, tremors, delirium, convulsions, possible death
	Barbiturates	Amytal, Alurate, Butisol, Mebaral, Numbutol, Seconal	Anesthetic, anticonvulsant, sedative, hypnotic	Moderate to High	Moderate to High	Yes	Oral, injected				
	Methaqualone	Quaalude	None	High	High		Oral				
	Benzodiazepines	Ativan, Dalmane, Halcion, Librium, Valium, Xanax	Anesthetic, anticonvulsant, sedative, hypnotic	Low to Moderate	Moderate to High						
Opiods	Alcohol	Many types	None	Moderate	Moderate						
	Opium	Pantofen, Paregoric, Parepectolin	Analgesic, antidiarrheal	High	Moderate (oral), High (smoked)	Yes	Oral, smoked	Euphoria, drowsiness, slowed respiration, nausea	Slow and shallow breathing, clammy skin, constricted pupils, coma, possible death	Watery eyes, runny nose, yawning, loss of appetite, tremors, panic, chills and sweating, cramps, nausea	
	Morphine	Morphine	Analgesic	High	Moderate		Oral, injected				
	Codaine	Many brands	Analgesic, antitussive	Moderate	Moderate		Oral				
	Heroin	Many street names	None in U.S.	High	Very high (IV)		Injected, smoked				
	Methadone	Dolophine	Analgesic, addict maintenance	High	Moderate		Oral, injected				
	Other opioids	Demerol, Dilaudid, Fentanyl, Percodan, Talwin	Analgesic	Varies	Varies						
	Hallucinogens	LSD	Acid, many others	None	None	Low	Yes	Oral	Visual illusions, hallucinations, altered perception of one's own body, increased emotionality	More prolonged episodes that may resemble psychotic states	Not reported
		Psilocybin	Mushrooms, shrooms								
		Mescaline, peyote	Mesc, cactus, others								
Amphetamine variants		DOM, STP, MDA, MDMA, Ecstasy, MMDA, TMA		Unknown	Unknown						
Phencyclidine		PCP, angel dust	Veterinary anesthetic	Very low	High		Oral, smoked				
Cannabis	Marijuana	Pot, grass, weed, many others	Under investigation	Very low	Moderate	Yes	Smoked	Euphoria, relaxed inhibitions, increased appetite, impaired memory and attention	Fatigue, paranoia, at very high doses a hallucinogen-like psychotic state	Insomnia hyperactivity (syndrome is rare)	
	Tetrahydrocannabinol	THC, Marinol	Nausea				Oral				
	Hashish	Hash	None				Smoked				

Federal Trafficking Penalties

DRUG/SCHEDULE	QUANTITY	PENALTIES	QUANTITY	PENALTIES
Cocaine (Schedule II)	500 - 4999 gms mixture	<p>First Offense: Not less than 5 yrs, and not more than 40 yrs. If death or serious injury, not less than 20 or more than life. Fine of not more than \$2 million if an individual, \$5 million if not an individual</p> <p>Second Offense: Not less than 10 yrs, and not more than life. If death or serious injury, life imprisonment. Fine of not more than \$4 million if an individual, \$10 million if not an individual</p>	5 kgs or more mixture	<p>First Offense: Not less than 10 yrs, and not more than life. If death or serious injury, not less than 20 or more than life. Fine of not more than \$4 million if an individual, \$10 million if not an individual.</p> <p>Second Offense: Not less than 20 yrs, and not more than life. If death or serious injury, life imprisonment. Fine of not more than \$8 million if an individual, \$20 million if not an individual.</p> <p>2 or More Prior Offenses: Life imprisonment</p>
Cocaine Base (Schedule II)	5-49 gms mixture		50 gms or more mixture	
Fentanyl (Schedule II)	40 - 399 gms mixture		400 gms or more mixture	
Fentanyl Analogue (Schedule I)	10 - 99 gms mixture		100 gms or more mixture	
Heroin (Schedule I)	100 - 999 gms mixture		1 kg or more mixture
